Objective

To use my knowledge in Python programming to contribute to creative projects, using modern frameworks and techniques to produce excellent software solutions, all the while refining my skills while keeping up with new developments in the industry.

Experience

- **Octanet**   May 2024 - June 2024
  Web development intern
  - Learn the Basics of web development
  - Implemented 3 to 4 project using HTML,CSS and JavaScript

- **CodSoft**   May 2024 - June 2024
  Web development intern
  - Enhanced my knowledge in web development during the internship
  - Implemented 3 to 4 web development based project

Education

- **Galgotias University**   2025
  B.tech(cse)
  8.5 cgpa

- **S.R.A.P College**   2021
  Senior Secondary
  65%

- **The Chandrasheel School**   2019
  Secondary School
  63%

Skills

- Python Java HTML CSS Javascript,
- Multitasking Compatible Punctual Determined

Projects

- **Voice control robot using Arduino**
  Our aim is to make a Robot vehicle which can be controlled by the voice command of a person.
- **Face Recognition Attendance System**
  The system works by capturing video from the default camera, detecting faces, and comparing them to a database of known faces.
- **Weather App**
  A weather app is a mobile application designed to provide users with real-time weather information and forecasts using Html CSS and JavaScript. Typically, it features a user-friendly interface that displays current weather conditions such as temperature, humidity, wind speed, and precipitation. Additionally, it offers hourly, daily, and weekly weather forecasts, helping users plan their activities based on anticipated weather changes.

Achievements & Awards

- Successfully completed AVR Microcontroller programming in Microchip Academic program
- Successfully attended the course Red Hat System Administration (RH124)
